Dear Ms. Velazquez:

This email is in regards to my interest in applying for Junior Java Software Programmer position you have recently posted through Handshake. As a soon-to-be college grad, I am confident that I could make a positive and productive contribution to your organization.

My attached resume gives evidence of my strong performance in my coursework. During my studies at Stony Brook University, I have had the opportunity to hone my skills with tools like Java, SQL, Matlab, JavaScript, HTML, CSS, JSON, and Python. Outside of the classroom, I am a research assistant who help develop complex models and algorithms to optimize the performance of data centers. Last summer, I worked at Charmtech Lab LLC for improving system performance by identifying bugs and optimizing current algorithms. I am also a teaching assistant who explain challenging concepts to students independently or in small groups.

I am currently available for an interview scheduled at your convenience. I have attached my resume detailing my academic knowledge and my technical skills. I look forward to meeting with you. Thank you for your time and consideration.

Sincerely,

Jie Liang

Enclosure
